ÎLE-DE-BATZ

A day of relaxation in the heart of nature

The Armonessence Association invites you to enjoy a unique sensory and creative experience at the Jardin Georges Delaselle on the Île de Batz.

Through olfactotherapy and land art therapy, we will guide you on a sensory journey to connect with the natural elements, the plant world and the living world around us.

As the day unfolds, your senses will be awakened, your attention will turn to your feelings, and your imagination will gradually open up.

Working with natural materials will be the central theme of this experience, fostering renewal and creativity.

The theme for this day is: 'Mosaic and Driftwood'

The aim of this day is to bring the cycle to a close.

Gain a fresh perspective on the world and embrace the new beginnings that lie ahead. Bring together and consolidate what you have learnt from your various experiences. Gather treasures from the foreshore and create a mosaic where every element finds its rightful place.

Programme for the day:

- Morning: exploring the garden and discovering some of the plant species found in the area.

- Afternoon: creative workshop, accompanied by the aromas discovered in the morning, which will support your creative process.

Please bring your own picnic. Places are limited to 10 participants to ensure high-quality guidance.

PLOUNÉVEZ-LOCHRIST

Concert by Patrick EWEN

Patrick Ewen, a folk singer and musician, once ventured out and got lost in the misty mists of his native Brittany, far, far away in the wild west of the world!

Ever since, he has been telling stories and singing about his homeland, the people who live there and their history.

The poet Yvon Le Men says of him: "Once upon a time, there was Patrick Ewen, who watched with a smile as his neighbours, his heroes, stepped out of the crowd and walked towards legend..."

On 5 September, he will perform his unmissable songs such as "Là bas dans les monts d'Arrée", "Oignon Johnny", "Elle est jeune, elle est jolie" and many others.

Signing session with David Bensoussan

Meeting to discuss his book "Hervé de Guébriant, de Saint-Pol-de-Léon et Landerneau à Vichy : un grand notable breton".

An exceptional Breton nobleman, Hervé de Guébriant embodied a singular social authority whose legitimisation mechanisms must be understood. The social trajectory of Hervé de Guébriant, which this book seeks to reconstruct in detail, enables us to grasp the process of "reinventing the nobility", which can be seen in the changes in his status as a notable over the course of the century. David Bensoussan holds a doctorate in history from the IEP in Paris and is a senior lecturer at the Lycée Chateaubriand in Rennes. His work focuses on the political history of the rural world.

GUIMILIAU

YS" exhibition by Benjamin Deroche

This double exhibition presents original works (photographic prints, oils on canvas) by Benjamin Deroche at the Centre d'interprétation - Les enclos in Guimiliau, as well as reproductions that can be seen in the photographic itinerary around the communes of the Landivisiau region.

Benjamin Deroche explores the Celtic legend of the town of Ys and uses it as the focal point of a photographic creation.

Drawing on a number of sources from the legend, including Émile Souvestre's Foyer Breton, Théodore de la Villamarqué's Barzaz Breiz and Charles Guyot's novel adaptation, Benjamin Deroche has produced an enchanting photographic series. From Douarnenez to the beaches of Sainte-Anne-la-Palud and Kervel, via Locronan, the Nêvet forest, Quimper, Le Huelgoat and Landévennec, the photographer has conducted an investigation. The result is a kaleidoscopic work that recreates the magic he projected onto the territory he travelled through.

To create a magical fiction, the photographer uses a whole range of techniques, combining oil paint, medium format and old digital SLRs, Polaroids and Portra 400 film. This combination of colour and black-and-white images, precision of detail and magnificent blurred images, landscapes and faces, silver and oil paint, gives rise to a 'magical realism'.

Philippe Le Guillou is the author of the text recreating the legend. The exhibition at the Centre d'interprétation - Les enclos features extracts from his texts.

The "YS" project devised by Benjamin Deroche and Emmanuelle Hascoët

was created as part of a residency at the Port-musée de Douarnenez in 2022 and was piloted by Fovearts. The project was adapted for the Kiosque in Vannes in 2025 before being presented in the Landivisiau region in 2026.

SAINT-POL-DE-LÉON

Exposition Kefloc'h'had

The Embardée collective (Ida Mitrani, Rebecca Bradley, Laure Colomer, Caroline Boyfield) will be presenting a collaborative exhibition exploring the links between seascapes, cultural identities and contemporary art. Through previously unseen works (paintings, installations, drawings and sculptures), the exhibition will explore the metamorphoses of the coastline, tackling notions of hybridisation, mutation and the fragility of coastal ecosystems. The artists will offer a sensory and speculative reading of these shifting environments, shaped

by flows, tides and the memory of the place. The flora and marine forms will be seen as poetic forces, revealing the permeability between the organic and the sensitive. This exhibition marks a key stage for the collective, testifying to its desire to explore the sea as a space for interaction and shared creation.

Open every day except Thursday, from 2pm to 6pm.

SOZO Exhibition – Cyanotype

SOZO

Means 'creation' and 'imagination' in Japanese.

As a cultural programme coordinator and graphic designer, I have always been driven by the need to create. With SOZO, I give free rein to a more personal form of expression, guided by my observation of nature and the emotions it evokes.

Plants are at the heart of my work. À fern, a blade of grass, a leaf left behind at a bend in the path... I am fascinated by these unassuming forms that make up the richness of life.

Through my creations, I seek to reveal their beauty and invite everyone to take a closer look at a biodiversity that is as precious as it is fragile. Each piece becomes an invitation to slow down, to contemplate and to reconnect with the nature that surrounds us.

Cyanotypes
Cyanotype is an ancient photographic process that uses sunlight to reveal the imprint of plants on sensitised paper. After being rinsed in water, the silhouettes appear in white against a deep blue background – the hallmark of this technique.

I love this alchemy between light, water, time and plants, where the unexpected makes each cyanotype unique. By varying the exposure times, I play with the shades of blue and the shadow effects that gradually reveal themselves, bringing depth, delicacy and movement to each composition. Depending on the intensity of the light, the transparency of a leaf or the delicacy of a flower, each imprint tells a different story.

Each cyanotype is an encounter between a plant, a moment and light – a way of capturing the poetry of the ephemeral and celebrating the beauty of life.

Free entry during the media centre's opening hours.

Exhibition: "A lifetime of drawing" by Patrice Pellerin

The exhibition highlights 29 drawings by Patrice Pellerin, the famous comic strip artist.

It brings together his earliest drawings, produced in the late 1970s and 1980s.

Before gaining recognition as a comic strip artist, he devoted himself to illustrating novels and history textbooks. Driven by a deep concern for accuracy, he based his work on in-depth historical research.

His drawing table becomes a veritable time machine!

The tour ends with the L'Épervier series, for which he is responsible for the script, drawings and colouring. Visitors can discover some of the plates in which he depicts the Château de Kerjean with remarkable meticulousness.

SIBIRIL

Exhibition: Pablo Picasso - Destins croisés

Following the huge success of its 1st exhibition on Leonardo da Vinci in 2025, this year Château de Kerouzéré welcomes one of the 20th century's greatest artists: Pablo Picasso. This exhibition focuses on a little-known facet of the artist: the creative spirit surrounding graphic arts, ceramics, photography and text illustration.

Come and discover this exceptional exhibition of original works by the artist. You'll also find works by Joan Miro, Salvador Dali and Dora Maar. The exhibition programme:

- Nearly 80 works by Pablo Picasso, scattered around the main rooms of the Château.

- An original exhibition showing a little-known Picasso: the ceramist, illustrator, engraver, lithographer, etc.

- Nearly 30 original ceramics made in the Madoura workshop in Vallauris: from plates to exceptional vases
This will be the first time the exhibition has been presented in Brittany, after stints in Italy, Turkey, Belgium and Luxembourg. An experience accessible to schoolchildren, with two educational packs (primary and secondary). The works are organised around 6 main themes: creative genius, Spain, women, ceramics, graphic arts and photography!

An unforgettable experience presented along the classic tour route of the Château de Kerouzéré, a new must-see destination in North Finistère.
